Serving you today, investing in tomorrow.

AURA WATER PROJECT

February 2023

Unitywater is installing new water infrastructure to meet future demand in a growing community. This important work will mean a continued safe and reliable service for the Aura community.

About the new infrastructure

The Aura Water project includes constructing a new water reservoir and installing 12 kilometres of new water pipeline from the Ewen Maddock Water Treatment Plant to Aura in Caloundra South. A map of the Aura Water project pipeline alignment is included on the next page.

Supporting our growing communities

The new water infrastructure will help meet the Sunshine Coast's growing population demands, both now and into the future, including the 50,000 residents who will live in Aura by 2050.

The project is part of Unitywater's commitment to support emerging communities on the Sunshine Coast by investing in sustainable water and wastewater infrastructure to meet population growth. In doing so, Unitywater will play its part in contributing to future construction industry opportunities at a critical time in our region.

Unitywater will continue to upgrade and invest in water infrastructure in a sustainable way to meet the demands of our growing region.

Project timeline

Construction Contract Award
Early 2023

Construction Starts
Mid 2023

Construction Complete
Late 2026

Installing the new infrastructure

Unitywater has undertaken a thorough planning process to ensure the Aura Water project is delivered in an economically and environmentally sustainable way.

We will work closely with the local community to keep them informed about the project and ensure any disruption is kept to a minimum.
