Redcliffe Wastewater Treatment Plant Outfall replacement

Project update: Marine works commencing in Hays Inlet

We are pleased to advise that work on the Redcliffe Wastewater Treatment Plant Outfall replacement project is progressing well.

Further to our previous notification, from **late-October 2026**, our delivery partner, **Downer,** and their subcontractors, will start work on the marine section of pipe replacement. This work will take up to **four months** to complete (weather and site conditions permitting).

During this work, a crane mounted on a barge will be in place in Hays Inlet to assist with the works. A temporary bypass will be connected to ensure uninterrupted wastewater services to the community while the pipeline is being replaced.

Please refer to the map over the page for more information.

Work hours

In addition to our standard working hours of Monday to Friday, 6:30am to 6:30pm the marine-based section of the project needs to be completed during high tide to allow safe access for vessels and equipment. As a result, work hours will be **between 4.30am and 6.30pm, Monday to Friday.** We will update you if work outside of these hours are required.

What to expect

- **Marine vessels** will be moored and operating in the Hays Inlet project area. There will be an increase in vehicle movements at the Pelican Park boat ramp as crews travel to and from the work area.
- **Pedestrian access changes**, including restrictions to recreational walking tracks, will be in place to keep the community safe. Please follow on-site signage.
- There may be an increase in **noise, dust and vibration** from the use of generators, pumps and construction activities. Every effort will be made to reduce impacts.
- **Increased truck movements** on Duffield Road to access the site during working hours.
- **Safety fencing and signage** will be installed around work areas to keep the community and wildlife safe.

Date

15 October 2026
