Potable Water Fill Station

Rucker Road, Wamuran

About this project

Unitywater is installing a new potable water fill station on Rucker Road, Wamuran. This will provide users with reliable, metered access to drinking water during dry periods and improve the strength of the local water network.

What we're doing

- Installing a new potable water fill station.
- Connecting the new potable water fill station to the existing water main.
- Constructing an asphalt parking bay so vehicles can safely pull off the road while using the fill station.
- Installing required electrical supply, cabling and switches, applying Unitywater signage and installing a protective cage around the unit.
- Restoring all disturbed areas like-for-like once work is complete.

What to expect

- Work is scheduled to start on **Monday, 18 May** and will take approximately four to six weeks, weather and site conditions permitting.
- Work will take place **Monday to Friday between 6:30am and 6:00pm**, with some Saturday work as required to meet project timeframes.
- Nearby residents can expect increased traffic, some general construction noise and possible dust. Every effort will be made to minimise disruption.
- To ensure the safety of road users and workers temporary traffic control will be in place, including reduced speed and road-shoulder closure. Please follow signage and drive to conditions

Want to know more

To find out more about this work, please contact the Dormway Stakeholder Engagement Manager, Amanda Marshall Smith, on 0419 327 033.

Thank you for your understanding as we undertake these vital works.
