Potable Water Fill Station Site Investigations

Rucker Road, Wamuran

About this project

Unitywater is planning to install a new potable water fill station on Rucker Road, Wamuran to support reliable, metered access to drinking water for approved users and to strengthen the local water network.

Prior to the main works, Unitywater, will be carrying out site investigation works to confirm underground services and ground conditions before finalising the design.

What we're doing

- Inspecting the existing underground services in the area of the proposed water fill station.
- Surveying the site.
- Locating and potholing underground services using vacuum excavation equipment.
- All disturbed areas will be reinstated like for like once work is completed.

What to expect

- Works will take place between 6:30am and 6:00pm on the 24 November 2025, and take 1-2 days, weather and site conditions permitting.
- Temporary traffic control will be in place and signage will guide motorists through the area, with reduced speed for safety.
- Access for local residents and emergency services will be maintained at all times.
- You may notice some noise and construction vehicles during investigations, but every effort will be made to minimize disruption.
- Unitywater will provide an update before the construction work begins.

Want to know more

To find out more about this work, please contact the Project Manager, Ben Donovan, on 0456 202 054.

Thank you for your understanding as we undertake these vital works.
