Email:		
Variation Justification: (Clearly detail the reasons for the variation and its impact on Unitywater network). Determination of qualification as Variation will be at the discretion of the Major Connections Certifier. Any variation that results in non compliance with the SEQ Code will require an amended decision notice.		
Variation Datailas (The variation m	ust either be sketched below or shown on a sep	
variation Details: (The variation m	ust either be sketched below of shown of a sep	barate drawing and must be legible)

Major Connections Certifier		
 The Major Connections Certifier must ensure the Variation (approved or otherwise): Does not affect the design integrity of the subject main and or adjoining downstream main/s; If the Variation: Changes condition/s of the water approval; and or Increase/Decrease the demand (number of equivalent persons) on the development, thereby requiring an amended infrastructure charges notice; Results in non-compliance with the SEQ Code. Then the Variation cannot be approved and the applicant (developer) will need to make a request to amend the conditions of approval. <i>(See Amendments to Conditions of Water Approval process in the Accreditation and Certification Manual).</i> 		
The proposed variation is: APPROVED INOT APPROVED
