1. Surge Control Device (SCD) is internally fitted to the trap outlet on the final retention tank.
2. Internal surface may be coated with Megapoxy H. Baffles constructed of HDPE/PP. Trays constructed of SS.
3. It is recommended the authorised Scavenger 2 unit be used within the Bio-Bizz Pty Ltd V2 Trade Waste System comprising the Scavenger 2, the Under-Sink Scavenger 1b (model BBSV1B) and Floor Lock.
4. The pre-treatment infrastructure is authorised for use as an adjunct pre-treatment unit located up-stream of another/existing grease/silt water separator. Approval as a stand-alone unit may be granted in exceptional circumstances and will be assessed on a case by case basis.
5. The CPS Liner System is installed into an existing grease/silt trap to extend the working life of the compliant grease/silt traps that may be compromised due to decay.
6. If installed externally, the interceptor must be protected from direct sunlight.
7. Internal baffles can be constructed of Rotationally Moulded Polymer or concrete.
8. All fixture and floor drain connections to the trap to be fitted with secure tamper proof strainer baskets.
9. These companies also provide similar devices at sizes not shown on list. Devices with sizes not on the list may be authorised on a **case by case basis**.
