

Modern Slavery Statement

1 JULY 2021 – 30 JUNE 2022

Acknowledgement of Country

Unitywater acknowledges the Traditional Owners of the lands on which we operate – the Jinibara, Kabi Kabi and Turrbal people. We recognise their significant contributions to the conservation of our environment and their deep connection to the land and waters.

We pay respect to their Elders, past, present and emerging, and acknowledge the important role all Aboriginal and Torres Strait Islander peoples continue to play within our communities

Our Cultural Spring motif symbolises a water hole, traditionally a gathering place where knowledge is shared. The depth of colour illustrates the connection between land and water and our commitment to reconciliation, bringing our people together and fostering a deeper understanding and respect for Aboriginal and Torres Strait Islander cultures.

We are proud to have worked with Gilimbaa Creative Agency on this cultural artwork.

Foreword from the Chairman

I am pleased to share Unitywater's third modern slavery statement and our commitment to eliminating modern slavery in all its forms.

We join likeminded businesses in ensuring everyone's human rights are protected and collectively meet the intent of the Australian Modern Slavery Act 2018.

At Unitywater, we know that preventing and addressing our own involvement in modern slavery is the first step in the fight against it.

We address this in our statement and outline our commitment to running a safe and responsible business that cares for our people, customers and community.

We set clear expectations for our team and suppliers, including contractors and agents. This helps raise their awareness of any possible involvement they have in modern slavery and what they can do to prevent and address it.

With a diverse supply chain, we ensure the suppliers we choose to work with operate ethically and in accordance with all applicable modern slavery laws. To achieve this, we outline these expectations in our Procurement Guide and through our ongoing engagement with our suppliers.

However, we know that adopting high standards is not enough. Knowledge sharing, training programs for our people and immediate action, including mitigation measures where we see a risk of involvement, are vital to ensure we maintain our commitment.

Michael Arnett Chairman

This Modern Slavery Statement was approved by the Board of Unitywater on 9/12/22.

1. Unitywater overview

1.1 Structure

Unitywater is a Queensland statutory authority that provides water and sewerage services to the Moreton Bay, Sunshine Coast and Noosa local government areas. It has four wholly owned subsidiaries, Headworks Australia Pty Ltd (ACN 637 942 646), Unitywater Properties Pty Ltd (ACN 651 651 042), WTCC Pty Ltd (ACN 651649633) and Unitywater Properties No. 2 Pty Ltd (ACN 651 834 883)

1.2. Operations

Unitywater operates in one of the fastest growing regions of Australia, providing essential water and sewerage services to three council regions that are home to 16.4% of Queensland's population.

We operate and maintain more than \$3.8 billion worth of essential assets, for customers across 5,223 square kilometres. Our service area stretches from Cooroy in the north to Samford in the south and from Bribie Island in the east to Kenilworth in the west.

On behalf of the Moreton Bay, Sunshine Coast and Noosa communities we:

- > maintain and supply drinking-quality water to homes, businesses and public areas;
- > collect, treat and dispose of sewage
- produce and provide recycled water to commercial and residential customers and community groups
- > manage trade waste from our business and industrial customers
- build, manage, operate and maintain our sewage treatment plants, water supply infrastructure and recycled water assets
- provide around-the-clock response to sewerage and water emergencies
- > manage customer and stakeholder enquiries
- > issue and manage water and sewerage accounts.

1.3. Supply chains

With the population of the Sunshine Coast, Moreton Bay and Noosa regions projected to grow from approximately 800,000 in 2016 to 1.2 million in 2036, we are planning to meet the future needs of the region in an economically and environmentally sustainable way.

Our investment will cater for population growth and ensure our infrastructure meets strict standards for our unique and delicate environment.

We will continue to upgrade and invest in sewerage and water supply infrastructure in ways that keep us at the forefront of environmental practices and meet the challenges of flood risk, population growth and climate change.

Unitywater had 1619 suppliers in 2021-22 who helped to ensure goods and services were provided for approximately:

- > 6101km sewerage mains
- > 800 sewage pump stations
- > 17 sewage treatment plants
- > 368,885 water connections
- > 6290km water mains
- > 71 water pump stations
- > 103 water reservoirs
- > 12 schemes supplying recycled water
- > 681 full-time equivalent employees.

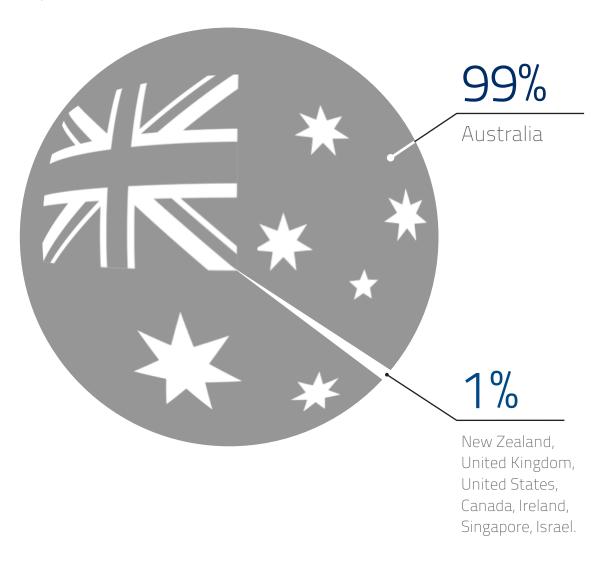

Over the course of the 2021-22 financial year Unitywater spent \$473M (inclusive of GST) on goods and services to provide water and sewerage services to the Moreton Bay, Sunshine Coast and Noosa regions.

Procured goods included water, electricity, chemicals, gas, machinery, equipment and fuel.

Procured services included construction, business management, machinery and equipment repair, waste management, facilities management, labour hire and recruitment, wet and dry hire and telecommunications.

99% of our suppliers are located in Australia with the remaining 1% of suppliers based in Canada, New Zealand, Ireland, Israel, Singapore, United Kingdom and the United States of America.

Figure 1 – Spend by supplier country*

^{*}Some suppliers are Australian subsidiaries of overseas suppliers.

2. Risks of modern slavery

2.1. Supply chain risks

Based on a review of our suppliers, the highest risk of modern slavery is in the following industries:

- > Water and sewerage services
- Non-residential building construction and non-building construction
- > Facilities management services
- Computer and technical services and electronic equipment
- > Industrial machinery repairs
- > Employment placement
- > Sanitary and garbage disposal

2.2. Operations risks

Unitywater recognises its responsibility to ensure its employees are: paid appropriate and fair remuneration; can access all leave and employment conditions they are legally entitled to; dealt with fairly and given natural justice in any dispute, especially our trainees and apprentices; and that there is no exploitation of children in our workplace.

Our modern slavery risks and their controls are summarised in the table below. These risks are actively managed through our Risk Management Database.

Table 1 – Modern slavery risks

,			
Risk Event	Controls		
Unitywater's suppliers engage in modern slavery	 Apply stringent due diligence to supplier selection process. Clearly articulate reporting and anti-modern slavery obligations in contracts. Develop an understanding of potential for exposure to modern slavery in supply chains. Develop a procedure for Unitywater to address modern slavery in its supply chain. Develop and apply a training system for specific Unitywater roles to help them identify and mitigate modern slavery risks. Regularly survey high risk suppliers on their compliance with modern slavery obligations. 		
Recruitment practices breach modern slavery requirements	 Review Unitywater employment contracts against human rights and modern slavery acts. Continue to ensure recruitment procedures include validation of applicants' right to work and age. Continue to ensure roles are assessed against award standards to ensure at least minimum remuneration is paid, if not better. 		
Obligations towards employees are not adequately protected or addressed	 Review employment contracts against human rights and modern slavery acts. Audit fatigue management systems, processes, procedures. Provide adequate systems of communication whereby employees can raise any concerns they have with Unitywater not fulfilling its obligations in a way that is transparent, fair and meaningful. 		

3. Actions taken to address risks

3.1. Supply chain due diligence

It is imperative that we only do business with ethical suppliers. An ethical supplier is one that offers quality jobs, provides a safe workplace, invests in training workers, demonstrates respect for workers, considers the environment and contributes to positive social outcomes for the communities in which the supplier operates.

To build supportive, transparent and collaborative relationships with our suppliers, we have developed an Ethical Supplier Questionnaire. In the 2021-22 reporting period, we invited suppliers identified in high-risk supply industries to complete the questionnaire, seeking further information about their business structure, operations, supply chains and other ethical practices.

Our tender templates, Procurement Guide and contracts have been updated to reflect our commitment to procuring from ethical suppliers. It provides the Unitywater team with information on what constitutes modern slavery and outlines the application to the sourcing process. Our market approach templates have been updated to include sample questions designed to gain an insight into potential supplier's supply chains and ethical practices.

Our purchasing contracts have been updated to include obligations for suppliers to assess, control and notify us of modern slavery. Doing business with ethical suppliers enhances our vision to be a sustainable water and sewerage service provider that creates value for its customers and returns value to stakeholders.

We are collaborating with Water Services Association of Australia (WSAA) and other water utilities from around Australia to understand how they are addressing modern slavery risks and to discuss any potential collaboration opportunities as we have similar suppliers across the sector. As part of this collaboration, we are investigating a risk-based survey platform which can be used to classify suppliers based on country of operation and industry risk.

We also collaborate with Queensland State Government Departments and Southeast Queensland utilities as part of the Queensland State Government Modern Slavery community of practice. The community of practice shares information, insights and issues to improve the knowledge of the group.

We continue to focus on providing training to our procurement team on how to screen suppliers for modern slavery risks throughout the procurement lifecycle and collaborate with those suppliers if risks are identified.

3.2 Operations due diligence

Unitywater respects ethical labour practices and values and promotes diversity. Consistent with these principles, we have a zero-tolerance approach to any form of modern slavery in our operations, whether it be servitude, forced labour, debt bondage, human trafficking or any other recognised form of slavery. We recognise our responsibility to:

- > represent the organisation accurately
- > accurately describe the type of work and work conditions
- > ensure that employees are given work they are lawfully able to do

- > ensure that employees are not harmed or exploited in connection with employment
- > provide fair remuneration
- provide a safe and appropriate work environment and work conditions.

Our recruitment policy helps to ensure all recruitment decisions are consistent with Unitywater values. The recruitment process is applied consistently and fairly, and we act in accordance with the principles from our policy. We have a formal recruitment process for both our permanent and contingent workforce that our recruitment team is required to follow. When external recruitment agencies are engaged to act on our behalf, they are also required to follow these recruitment processes. It is also imperative that our recruitment team and hiring leaders identify and support diverse candidates throughout the recruitment process so that we can build a more diverse and inclusive workplace.

Our online recruitment management system includes verification points to ensure our policies and procedures are correctly followed. For example, a candidate is required to verify their identity and confirm their right-to-work status. Using the information provided, contracts are prepared, that comply with relevant legislation and Unitywater's policies and procedures.

To mitigate the risk of modern slavery, we use a range of engagement methods to source applicants depending on the needs of the business. In all cases individuals can apply for work, decline an offer or otherwise opt out of the process at any time.

Each position, whether advertised internally or externally, has been assessed to ensure there is no misleading information and to establish that it is a genuine vacancy that can be filled. A position description is always prepared and provided to candidates on request.

Candidates are provided with a written contract of employment prior to their commencement that confirms the terms and conditions of employment including position title, salary information, work location, conditions and entitlements.

We have comprehensive policies, procedures and systems in place to ensure that employees are paid accurately and on time, in accordance with their contractual entitlements and that leave entitlements are granted consistently and in line with the requirements of the Fair Work Act 2009 (Cth).

We conduct an annual reconciliation to assess and address the potential risk of underpayment and failure to correctly calculate leave accrual.

We review total compensation annually to ensure employees are paid appropriately at or above the applicable industrial instrument. In the event of any shortfall, this is corrected each year as part of the annual reconciliation process.

A modern slavery training program was issued to all leaders, including team members from Procurement, Wellbeing and Continuous Improvement, Human Resources Business Partnering and Recruitment. The training addressed acceptable working conditions and the risks pertaining to modern slavery. Refresher training for applicable team members will be provided every two years.

The modern slavery training module forms a part of the onboarding process for all new team members, based on their role.

4. Effectiveness of actions

We utilise a compliance system developed by a global content provider to monitor and assess modern slavery legislative obligations. Managers across our organisation have been delegated responsibility for maintaining and periodically reviewing our modern slavery obligations as they apply to their business units. If a potential non-compliance occurs, then it is reported, assessed, investigated and monitored through a tailored software system. Trends and material non-compliances are reported to the Audit and Risk Committee quarterly.

We also have a robust risk management framework which enables the organisation to respond to risk in an active and live manner. Critical to the effectiveness of this framework is the use

of a database that allows for live tracking of risks and the actions assigned to each. The risks identified in this document have been incorporated into the database and both actions and controls are assessed for effectiveness in regular reviews.

The business is currently refreshing its Code of Conduct documents for both employees and contractors, with the Code incorporating clear expectations around identifying and eliminating modern slavery. Training on the updated Code will be developed and rolled out to the business to supplement the existing modern slavery training modules.

5. Consultation with subsidiaries

During the statement period Unitywater's subsidiary company, Unitywater Properties No. 2 Pty Ltd, contracted with a third-party supplier for design and construction. In keeping with the measures set out above in section 3, the contract document includes obligations for the supplier to assess, investigation, control and notify Unitywater Properties No. 2 of any modern slavery within its operations and supply chain. Unitywater Properties No. 2 retains the right to terminate immediately should the supplier breach this obligation.
